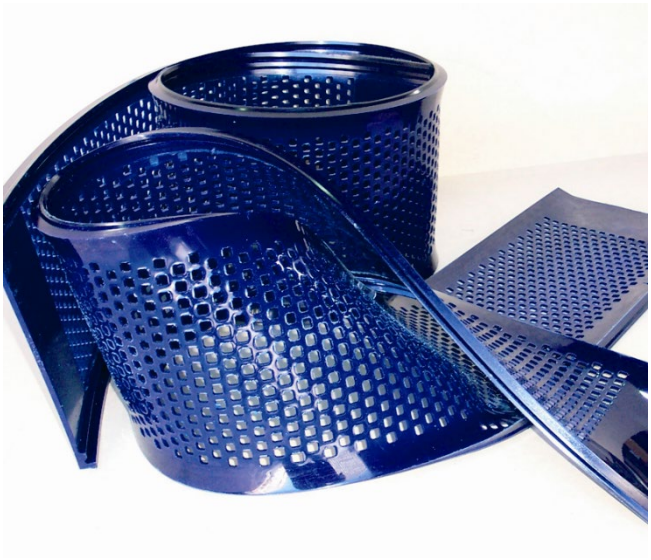
Technical Data Sheet

Jumping Screens

Agile Screening Jumping Screens (also known as Flextec or Poly Flip Flop) are manufactured from wear resistant polyurethane. The non – blinding screen panel can be used in Flip-Flop type screen machines, e.g. Binder Bivitec and Hein Lehmann screen types.



Benefits:

- Long life
- High quality material
- High efficiency screening

Features:

- High flexibility
- Various width, lengths and apertures
    1. Width (246mm & 327mm)
    2. Length (3.2mm, 2.49mm, 1.9mm & 1.2mm)
- Various thicknesses (5mm & 10mm)

Profiles:

Agile Screening Jumping Screens are available to suit the main two machine profiles; Bivitec and Hein Lehmann. Within each profile several aperture sizes and configurations are available, plus custom designs can be scoped to suit.

Accessories:

Locking Strips (for Bivetec screens)
